The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz/tools/investor-kickstarter](http://sorted.org.nz/tools/investor-kickstarter). Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 year period to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

## Specific investment risks

### Fund of funds risk

The Fund currently invests in Nikko Asset Management New Zealand (Nikko) managed funds. The performance of the Fund's investment in a Nikko managed fund may be affected by unexpected changes in market

conditions. This may impact on investors' returns or ability to withdraw from the Fund. To reduce this risk, the Fund's Investment Manager, Suncorp Corporate Services Pty Ltd (SCS), monitors and reviews the investment performance of the Nikko managed funds against targets and benchmarks on a monthly basis.

*Underlying fund investment manager selection risk*

The Fund's investment in a Nikko managed fund may be subject to the risk that a fund manager selected by Nikko underperforms, resulting in lower returns than the relevant market indices or investment objectives. To reduce this risk, Nikko have a thorough manager research and monitoring process and diversify across a number of managers. From a strategic perspective SCS reviews the performance of Nikko at least every 2 years. Also, SCS have quarterly meetings with Nikko or more frequently where changes in the business or market environment necessitates.

*Service provider risk*

There is a risk that a service provider involved in the investment management and administration of the Fund may breach or fail to perform its obligations. This could impact the operations of the Scheme including the ability to process withdrawals or adversely affect investors' return on investment. From a strategic perspective to reduce this risk, SCS and the Suncorp New Zealand (SNZ) Investment Sub-Committee actively monitor and review the performance of all service providers to ensure compliance with contractual arrangements at a minimum every 2 years. The SNZ Finance team have monthly and quarterly meetings with service providers or more frequently where changes in the business or market environment necessitates.
